- ❖ Vertical Cartridge Pulse Jet Testing
- ❖ Horizontal Down-flo Cartridge Pulse Jet Testing
- ❖ Medium Pressure/Hi-Volume MCF Testing
- ❖ SEntry Testing
- ❖ Computer Generated Graphics Show Performance
- ❖ Optional Test Video

Engineers at our Sabetha Filtration TestCenter can help you find the best and most cost-effective solution to your dust collection challenges. We perform hundreds of tests each year to determine the characteristics of air-borne industrial pollutants and how best to control them.

Our Sabetha TestCenter features a Particle Emissions Test Machine that can be set up in various filter configurations and with selected filter media. Testing enables us to analyze the results of using varying air-to-cloth ratios and grain loading with different configurations to build the most cost and energy efficient dust collectors for your applications.

Come watch as your particulate samples are analyzed and tested on various combinations of filtration equipment and filter media.

## Directions to Sabetha, KS

Mac Process's Kansas location is in Sabetha, KS, about 1½ hours northwest of the KCI Airport. From KCI Airport:
